Message from the Dean

The University of Texas at San Antonio College of Business has the privilege of training the next generation of business professionals, managers, executive leaders and wealth creators. We take this responsibility to heart. Our vision in the College of Business is to transform our students from the curious and hopeful into confident and career-ready professionals.

Whatever your next career level is, the UTSA College of Business provides the knowledge and skills to get you there. Nationally ranked and recognized, the UTSA College of Business is the place where undergraduates, graduate students, doctoral candidates and business executives find opportunities to increase value in their careers and thrive in their chosen professions.

As future business leaders, you need an education partner who understands how dynamic the workplace is and appreciates how responding to the ever-changing market requires agility. We deliver unparalleled value through educational programs that supply students with technical and professional skills that can be implemented immediately in the workplace in high-demand areas.

We offer different degree programs including our signature Master in Business Administration; our one year Master of Science in Business for non-business undergraduates; and our Master of Science in Data Analytics. Additionally, the College of Business cyber security program was named the No. 1 program in the nation, and our Executive MBA program has graduated C-suite executives for most major corporations headquartered throughout Texas.

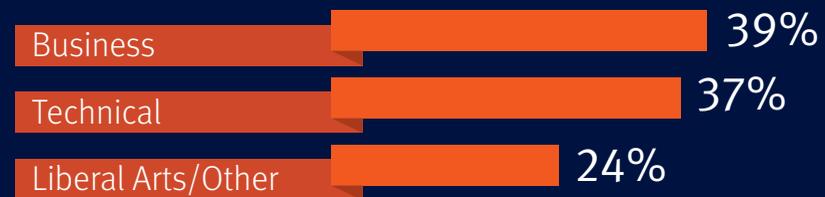

As UTSA emerges as a Tier One research university, our top-tier academic programs are gaining global recognition, but we refuse to rest on our laurels. Like the business environment we support, we continually strive to better meet the growing needs of the community we serve and to improve the social and economic development, not only of our students, but also for San Antonio, the state of Texas and the nation.

Let us help you unlock the future and reach the next level in your career.

Wm. Gerard Sanders
DEAN AND BODENSTEDT CHAIR

Specialty Programs

OPEN
BIGGER
DOORS

The UTSA Executive MBA is the most prestigious of the College of Business graduate programs with limited admission every year. Our Executive MBA students are entrepreneurs of private enterprises, medical practice professionals and directors from most major corporations in Texas.

Our EMBA curriculum focuses on current and relevant issues facing today's industry leaders, such as the business implications of big data and cyber security. Combining theoretical topics with practical applications, the EMBA helps executives develop skills to drive better business outcomes.

Bringing business leaders together to share their unique perspectives under the facilitation and academic instruction of our world-renowned faculty, the program is designed to accommodate the schedules of working professionals. The comprehensive 21-month EMBA maximizes the time in the classroom without overly taxing the already busy calendars of future C-suite leaders.

UNLOCK
BIG
DATA

According to a report by the McKinsey Global Institute, the U.S. faces a shortage of 140,000-190,000 individuals with deep analytical skills as well as 1.5 million managers and analysts capable of analyzing big data.

That's why we designed this full-time, 12-month daytime and 16-month evening cohort program. Drawing upon experiential learning, students will become data savvy by learning the latest tools, techniques and applications used to transform data into intelligent results.

Our program is unique because it leverages the College of Business' strengths in cyber security, bioinformatics and statistical analysis to provide students with the opportunity to study the latest communication and visualization technologies so that when they graduate, they can share these insights with their future employers to influence business productivity and profitability.

SECURE
YOUR
FUTURE

UTSA was ranked the No. 1 cyber security program in the country by the Ponemon Institute and was one of the first schools in the nation to be certified by the National Security Agency and the Department of Homeland Security as a Center of Academic Excellence.

From faculty to facilities and hands-on training, this is the premier place for cyber security education located right here in Military City, USA. The college offers personalized training for students as they study biometrics, data mining, intrusion detection and cyber forensics in our state-of-the-art cyber security laboratories.

Graduates of the program are highly sought out and have been placed in government and private sector positions with such employers as the 24th Air Force, the Central Intelligence Agency, Chevron, Digital Defense, Federal Bureau of Investigations, H-E-B, National Security Agency, Rackspace, Raytheon, USAA and many others.

TURN YOUR
PASSION
INTO PROFIT

The UTSA Master of Science in Business is a graduate program designed for undergraduates who have completed a degree in a field outside of business. The MSB provides an opportunity for recent college graduates to obtain graduate level business training as a complement to their previous studies.

This one-year program challenges students to develop cutting-edge business acumen and critical thinking skills. Our intensive business curriculum offers students the keys to successfully turn their passion into profits and includes quantitative analysis, organizational behavior, financial accounting, marketing management and effective negotiating.

Every full-time cohort follows the same course schedule in lockstep and attends classes during the day. Our students complete the program with industry insights and applied learning to increase value to their chosen career paths.
