The Bachelor of Business Administration in Operations and Supply Chain Management uses a multidisciplinary approach to teach students how to design systems, make decisions and solve complex problems for organizations and their supply chains. In the program you will gain analytical, communication and organization skills necessary in today’s workplace—with the ultimate goal of contributing to improved business decision-making.

To meet the needs of working professionals, classes required for the major are also offered in the evenings.

**PROGRAM OVERVIEW**

Operations and Supply Chain Management deals with the creation of goods and services and the management of their flow between businesses and consumers. In the program, you will have the opportunity to learn:

- How to plan and manage forecast demands, materials, production, operations, distribution, logistics and more
- New methodologies to improve business processes
- Ways to increase profit by reducing waste, improving efficiency, environmental sustainability and social responsibility

**Program Tracks**

- **Management Science**: Focuses on theoretical development and quantitative analysis
- **Operations and Supply Chain Management**: Provides hands-on experience and essential knowledge leading to professional certifications

**Coursework**

- Global Supply Chain Management
- Lean Operations and Six Sigma
- Logistics Management
- Production and Operations Management
- Project Management
- Service Management and Operations

To meet the needs of working professionals, classes required for the major are also offered in the evenings.

**Top-Ranked Faculty**

Our Operations and Supply Chain Management faculty are ranked among the top 100 business schools in North America in terms of operations and supply chain management research productivity in elite professional journals during the last five years (2016-2021).
Gain Practical Hands-on Knowledge and Skills

This program is taught by a group of knowledgeable and experienced faculty members who are known nationwide for their research contributions and for their close connections to the business community.

We encourage you to pursue the numerous internship and practicum opportunities available in our regional industries and public institutions, many of which can be used toward satisfying your degree requirements.

As part of the Operations and Supply Chain Management program, you can gain knowledge and experience toward professional certifications, such as:
- Logistics Transportation and Distribution (CLTD)
- Planning and Inventory Management (CPIM)
- Supply Chain Professional (CSCP)
- Six Sigma and project management certifications

In 2021, the Council of Supply Chain Management Professionals reported an average salary of $76,693 for those with 0-5 years of experience.

Career Outlook

The U.S. Bureau of Labor Statistics projects that employment of logisticians, which is one of the many areas where our graduates can work, will grow 30% from 2020 to 2030, much faster than the average for all occupations.

Also, according to BLS, general and operations managers held about 2.4 million jobs in 2020.
